## PERSONAL PROFILE

---

An enthusiastic, motivated, hardworking individual, well accustomed to working in high pressure environments and able to adapt well to change. Possessing strong technical skills set and currently working toward a Degree in Information Technology at Teesside University. A highly efficient and resourceful person who is always prepared to learn new processes to achieve outstanding results and have a strong ability to multitask, prioritise and work collaboratively with colleagues. Now looking to move forward in my career, take on more responsibilities and develop additional skills in a new working environment.

## Core Skills

---

- Fast learner
- HTML, CSS, JavaScript
- MongoDB
- Microsoft Power Apps
- Adaptability
- Python
- Data Analysis
- Network Design
- Teamwork
- SQL Server
- WordPress
- Security Practices

## EDUCATION

---

09/2021 – Present      **BSC (Hons) Information Technology**, Teesside University, Middlesbrough

### Year One Modules

System Database & Design (70%)  
Rapid Application Development (81%)  
Secure Data Acquisition (82%)  
Business System Development (54%)  
Information Security & Cybercrime (60%)  
Python Programming (52%)

### Year Two Modules

Relational and NoSQL(69%)  
Networks & System Administration(72%)  
Rapid Development System(52%)  
IS Developer  
Open Source Business Solutions

2018 – 2020      **Physical Science**, Xavier International School, Nepal

- Achieved a Higher Secondary Education
- 3.19 GPA

2018      **Secondary Education Examination**, Alakapuri School, Nepal

- 8 qualifications– including Maths, English and Science
- 3.6 GPA

## KEY PROJECTS

---

### Web Development

[Access to Github](#)

### [Cost of Cancer treatment](#)

In absence of the team leader, I was responsible to manage the project. We divided the tasks and sub tasks in the group of three and managed to satisfy the requirement of the project. We used HTML, CSS, and a portion of JavaScript to finish the project. Some other tools like; Asana, lucid charts were used for the documentation and project management.

### Web Development

(Current)

### [MFC Foundation](#)

Along with two of my classmates, I volunteered for the web development opportunity where we will be replicating the current website using WordPress, over the course of

a year. We are in charge of creating the coding that brings website to life and help it to perform as required by the admin, and designing the website both visually appealing and smoothly operating. Additionally, we will test both new and current sites and fix any possible errors that may appear.

## Website Enhancement (Current)

[Access to Github](#)

[mmaps website](#)

Using web development technologies to enhance the website to incorporate hiring and recruiting of Software Development Teams. As a team leader, I am in charge of guiding, monitoring and leading an entire group of six. I make weekly plans to make sure the project is on track and host weekly meeting where everyone in the group discusses about the project and gets updated. The project is due in two months.

## SQL Queries

[SQL Modules Portfolio](#)

With SQL Server, the portfolio is focused on writing optimized TSQL queries or scripts to retrieve related data so it may be used by other applications.

## Python Data Cleaning

[Data Cleaning Using python](#)

The portion of dataset from the KDD Cup Data from 1999, (International Knowledge Discovery and Data Mining Tools Competition) is selected for the data analysis. The dataset is cleaned properly to make it ready for the analysis using Python and pandas. Having little to no knowledge about programming but a strong passion towards it, I was surprised to see how I could play with data and analyse it using bits of code.

## Networks and Systems

### Administration

[Upgrading the Local Area Network of Barclays Bank](#)

Network is replaced in bank with single office building with four levels as it no longer satisfies the high standards for performance and availability demanded. Along with the design all the hardware and wiring are updated. By keeping it budget-friendly, a solution is offered that not only addresses the needs of the present but also ensures that those needs will continue to be satisfied in the near future.

## EXPERIENCE

04/2022 - Present

**Esso Rontec Coronation**, Middlesbrough  
Sales Assistant

Dealing with customers is a key part of my job. I am to take cash or card payment of the fuel. My job requires selling other products like food, drinks, and newspaper. I assist in balancing the shift sheets and calculate the day report. General duties involve keeping forecourt and shop areas clean, restocking shelves, managing stocks and fuel deliveries.

11/2021 – 04/2022

**GO Local**, Middlesbrough  
Sales Assistant

My main responsibility was to greet the customers, enquire about what they are seeking and endeavour to meet their needs. I used to work out sales prices, total purchases and operate the cash register to processed cash and credit payments. Additionally, I also managed the finance of this small family business. My role also involved restocking inventory and maintaining a clean and tidy shop.
