## PROFILE

"As an aspiring Information Technology student, I am constantly seeking new opportunities to enhance my technical skills and expand my knowledge. My passion lies in writing code and building innovative solutions to real-world problems. With experience in programming languages such as Javascript, MySQL and expertise in using tools like Visual Code, I am well equipped to tackle complex development projects and provide efficient solutions.

I have hands-on experience in developing dynamic web applications and databases. I have been working on projects that involve implementing complex logic, creating custom scripts and automating repetitive tasks using JavaScript. I have also gained experience in managing databases using MySQL and have developed a keen understanding of database architecture and optimization techniques.

I am always eager to learn more and stay up-to-date with the latest trends and technologies in the industry. I believe that my technical skills, combined with my passion for technology, will enable me to make a valuable contribution to any team or project. If you're looking for someone who is committed, reliable and passionate about technology, I would love the opportunity to discuss how I can bring value to your organization."

## Experience

**OPS IT**

Amazon

Aug 2022 - Present (8 months)

Technology behind the Smile

We build and support the technology Amazon businesses use to deliver packages into the hands of our customers. We streamline our processes using the latest applications in science, machine learning, and scalable distributed software on the cloud. We exceed the expectations of our customers by ensuring their orders are delivered where and when they need them, as quickly, accurately, and cost effectively as possible.
